

Thousands of technology projects are being launched by justice and public safety agencies to prevent, reduce, or otherwise address the impact of crime, terrorism, and national disasters through information sharing. While these justice and public safety professionals and technologists are responding to the national imperative to share vital information, protecting our citizens with effective technology while serving our taxpayers with responsible investments requires a heightened level of national coordination, collaboration, and support.

The IJIS Institute Project Management Team is committed to fulfilling these critical technology requirements by joining the collectively neutral expertise of private industry with the resources of jurisdictionally distinct agencies in the creation of nationally acceptable and openly accessible information sharing solutions.

This innovative service model permits the IJIS Institute Project Management Team to offer a cost-effective means of developing information sharing standards while securing the endorsement of private and public professionals through their active participation.

IJIS Institute membership collectively offers technology and company-neutral solutions. IJIS Institute members include technologists from more than 200 leading firms that supply IT solutions and services to the justice, public safety, and homeland security sectors.

The IJIS Institute Project Management Team is helping private and public professionals design and adopt standardized information sharing solutions through pragmatic, results-oriented technology services and projects. These services and products include:

Adaptive coordination and management of grant funded information sharing projects and programs.

Creation of tools that enable usability and continued relevance of information sharing standards and guidelines.

Implementation of systems that promote adoption and ongoing improvement of information sharing standards and guidelines.

Private industry contribution to national forums that promote or address information sharing issues, advancement, education, best practices, and outreach.

The IJIS Institute Project Management Team is comprised of seasoned project management professionals who value the power of collaboration and have proven able to appropriately balance time, cost, scope, and quality in a manner that maximizes tangible results and quantitative value. IJIS Institute Project Managers have already successfully applied their skills to the following operational areas:

- Drug Monitoring
- Law Enforcement
- Public Safety & Communication
- Victim Services
- Transportation
- Forensics
- Prosecution
- Fusion Centers

The team has also demonstrated specific expertise in:

- NIEM and GJXDM
- IEPD Development
- Global Justice Reference Architecture (JRA)
- Business & Exchange Modeling
- Conference Planning & Management
- Education and Outreach

The IJIS Institute Project Management team helps public safety and justice professionals realize the power of information sharing by cultivating collaboration and finding common ground among diverse communities.
